PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate specializing in Artificial Intelligence, Machine Learning, and full-stack software development. Proficient across Java, Python, C/C++, JavaScript, PHP, React, and Flutter, with hands-on experience designing AI-driven applications and end-to-end systems. Currently leading development of a full-stack AI platform integrating generative design, 3D visualization, and CAD automation. Strong analytical and problem-solving abilities with a track record of collaborative, cross-functional project delivery.

EDUCATION

Mangalore Institute of Technology & Engineering (MITE)

May 2023 – May 2027

Bachelor of Engineering (B.E.) — Computer Science Engineering | CGPA: 7.3 / 10

AACPUC

2023

Pre-University Course (12th Standard) | Percentage: 84%

Green Valley National School

2021

SSLC (10th Standard) | Percentage: 89%

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript, PHP

Web & Mobile Technologies: React, HTML, CSS, Flutter

Databases: MySQL, MongoDB, SQL

Frameworks & Tools: FastAPI, Git, Visual Studio Code, Three.js, AutoCAD, DXF

Core Areas: Full-Stack Development, Machine Learning, Generative AI, Web Development, Mobile Application Development, Quantum Computing, Affective Computing, Data Structures & Algorithms

PROJECTS

Automated 2D & 3D Floor Plan Generator with AutoCAD Integration

Feb 2026 – Present

Python | React | FastAPI | C# .NET | Three.js | XGBoost

- Engineered a full-stack AI-powered architectural platform that automatically generates optimized 2D residential floor plans from user-defined constraints using a custom room allocation and adjacency algorithm.
- Developed an interactive 3D visualization system with Three.js, converting generated 2D layouts into immersive, real-time-rendered 3D floor plans.
- Built a custom C# .NET AutoCAD plugin to synchronize CAD drawings with the web application through automated DXF processing, enabling seamless design updates between platforms.
- Integrated XGBoost and Linear Regression models to estimate construction costs from layout characteristics, built-up area, and structural parameters, improving cost-estimation accuracy for end users.
- Collaborated within a four-member cross-functional team, coordinating frontend, backend, and machine learning workflows under faculty guidance to deliver a working end-to-end prototype.

COURSES & CERTIFICATIONS

- Infosys Springboard — Introduction to Cloud Computing (April 2026)
- NPTL Certification — Data Mining, IIT Kharagpur (January – March 2026): 8-week course covering data preprocessing, classification, clustering, association rule mining, pattern discovery, and data analytics.
- Workshop — Developing Data-Driven Product Backends with Java, Spring Boot & SQL, MITE (May 2025): Practical backend development experience for data-driven applications.

ADDITIONAL INFORMATION

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability, Time Management, Quick Learner

Languages: English, Hindi, Kannada, Konkani
